

# New Blobfish Variant Kills Man by Squashing Him

Another thing the Government has been hiding from us

At about 2:30 on Saturday the 27<sup>th</sup> of May, Jamison Gibbus was crushed to death by a giant blob fish in the Solomon Islands.

The blob fish, also known as *Psychrolutes marcidus* are usually quite small and manageable but this one was up to 20 metres long and almost ate the drone that found it. When it crawled onto the Jamison bravely approached the blob fish but it flopped onto him and he was crushed to death. Hunters soon closed in and sedated the creature and it was taken away by scientists.

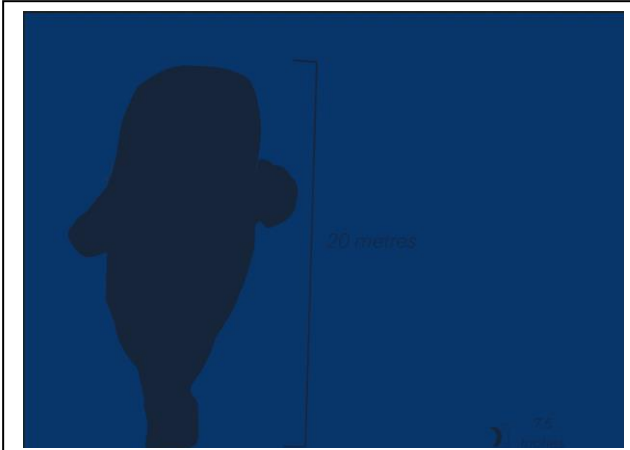

Scientists soon published an article and concluded that there is no way that it was bred in the wild so it has been universally concluded that it is a secret government weapon that has escaped from Area 51 and it has flopped all the way to the Solomon Islands.

It has been noted that the US government has not commented on the situation, which only strengthens our ideas. When scientists took the creature in for tests they concluded that it was special modifications and Darwinian evolution that must have caused this freakish fish.

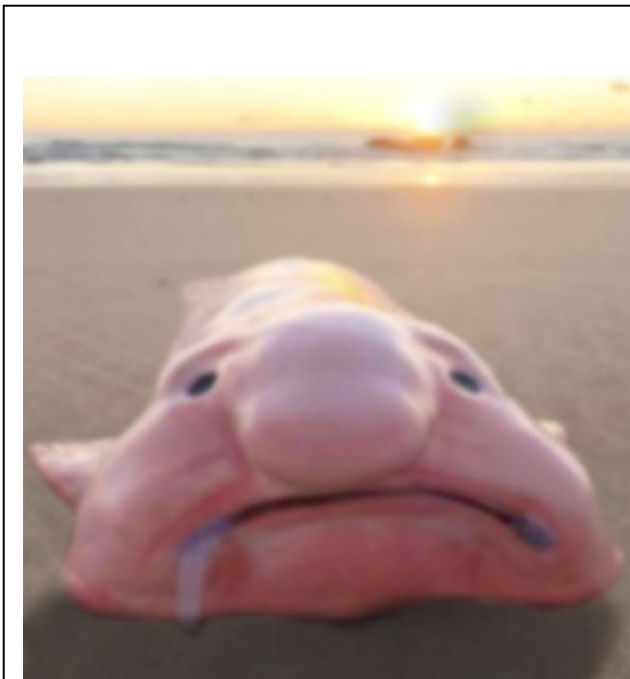

If the US government is behind this then there is no telling where animal modifications stop or if it was caused in nature then what happened to that blob fish that caused it to grow to its incredible size.

Insiders have stated that more of these exist and they were launched by the US government to secure dominance over the oceans and if this is true it could mean the end of peace underwater. It would be a sign that the US is preparing for war and if they are then who is the enemy, is it China, North Korea, terrorist units or a group of countries looking to be the new super power?

Countries with diplomatic ties to the US have come out with there statements addressing the war conspiracies. The UK stated that “ we don't want to go to war but if a foreign enemy threatens our tea supplies then we will go to war”. Canada stated “we're to kind to go to war” and Japan stated “ this'll make a great anime”.

The massive blobfish (banana for scale)
